

**NEW  
PRODUCT**

The Pruning Folding Saw

**The grip  
that designed  
three grips.**

**Sharp Zact New Sale**

The saw tooth is light  
and the ideal tooth  
pitch which cuts fast.  
The too angle design

Open and stop,  
close and stop,  
safty W stopper

Finishing : Hard chrome  
plated finish is rust proof,  
friction free and produces  
a smooth cut surface  
similar to planed surface.

The Saw Blade: It can be easy  
cutting lengthwise and crosswise,  
slant by adoption of Tatebikime.

It adopted the soft  
elastomer which is  
hard to glide and  
power is transmitt  
-d through.

Grinding : It's not set tooth  
by hollow grinding.  
Beautiful Section

Impulse Hardened Teeth :  
The blade point is super  
hard by hard impulse.

**No need to sharpen the blade.  
When the blade didn't cut,  
please use the spare blade.**

**1 Control**  
When it prune  
between thin  
branches,  
slender grip can  
regulate delicate  
power.

**2 Balance**  
It can cut it off  
neatly without  
hurting a tree and  
big oval shape of  
stable grip.

**3 Power**  
It can cut at a stretch  
big branch and hook  
shape to support  
a grip of the  
power.
