SANYO METAL WORKS
<http://www.sanyo-mt.co.jp/en/>

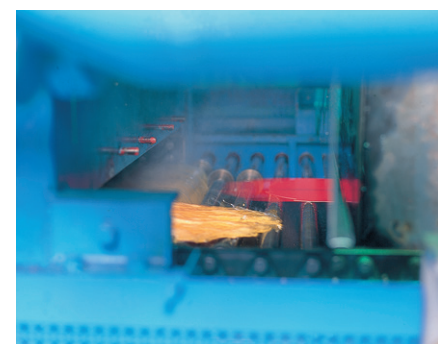

<Miki is the world famous city of cutting instrument>

Sanyo Metal is located in Miki city where is famous for cutting instrument more than 400 years. Three of our factories are in this city and we are manufacturing high quality cutting tools and blades for use in agricultural, gardening, horticulture and forestry machinery.

<Sanyo Metal>

Sanyo Metal produce high quality products by an integrated manufacturing system with various types of machines and equipment, and with up-to-date facilities.

Employees use creativity and ideas to enhance operations, improve safety, and reduce the costs of products to deliver reliable products to customers through meticulous quality inspections targeting all products. Sanyo Metal is committed to satisfying the needs of our customers and contribute to the society by developing better products.

Sanyo Metal is one of the most leading company in Japan as a manufacturer of brush cutter blade and we use Japanese special steels for our various blades materials.

Sanyo Metal is now being exported to about 40 countries and regions around the world and delivered to many users for various uses.

Brush Cutter Blade

Grass Cutting

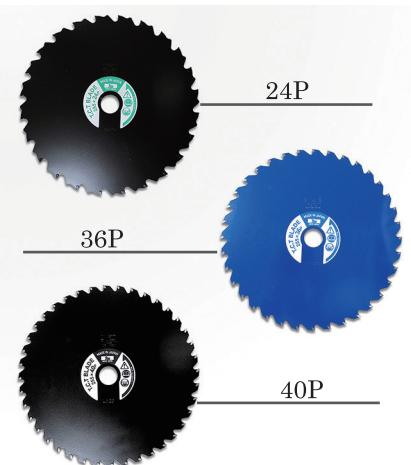

Code	Teeth	Diameter×Thickness	Bore	Q'ty / Carton	Gross weight /Carton

Grass/Bush Cutting (TCT Saw blade)

Features and Benefits

Sanyo's TCT Saw blades use tungsten carbide without impurities. It is hard to worn out and it keep sharpness for a long time. Tip of saw blade is not easy to fall off by our original brazing technique. So you can use blades more long time.

Code	Teeth	Diameter×Thickness	Bore	Surface	Q'ty / Carton	Gross weight /Carton
3964	24P	255mm×1.25mm	φ25.4mm	Black	25pcs	13kg
3960	36P	255mm×1.25mm	φ25.4mm	Blue	25pcs	13kg
3961	40P	255mm×1.25mm	φ25.4mm	Black	25pcs	13.5kg

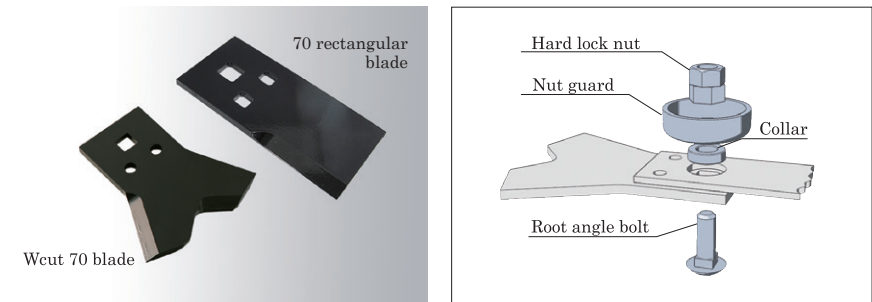

Blade for footpath mower

Ride-on Brush Cutter Blade

Features and Benefits

Absorb the shock and reduce a burden of machine.
Not easy to crack the edge so it is economic.

- 1)Wide knife-edge can cut sharp.
- 2)Comfortable cutting quality.
- 3)Material is spring steels with stickiness.

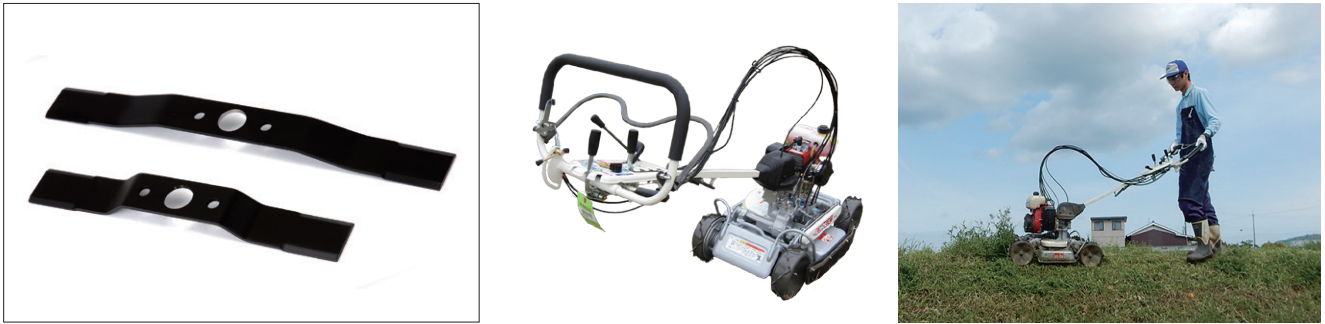

Code	Description	Size	Adaption Model	Q'ty / Carton	Gross weight /Carton
0466	W cut 70 blade	145mm×70mm×6.0mm(2pcs/set)	For OREC atex	10sets	10.5kg
0478	70 rectangular blade	145mm×70mm×6.0mm(2pcs/set)		10sets	13kg
0476	M14 BOLT SET	Bolt:14×40 Nut:M14 Nut guard:M14		20sets	4.5kg

Blade for footpath mower

Features and Benefits

- 1)Blade life is longer than an orignal manufacturer's product.
- 2)Material is spring steels with stickiness.

Code	Description	Size	Adaption Model	Q'ty / Carton	Gross weight /Carton
0457	Mower Blade 350	355mm×40mm×4.5mm(2pcs/set)	For OREC	10sets	10kg
0458	Mower Blade 255 with Nut	260mm×30mm×2.3mm(4pcs/set)		10sets	6kg
0459	SP-50 blade Installation Nut	M10NUT Include SW(2pcs/set)		-	-
0460	Mower Blade 400	410mm×40mm×4.0mm(2pcs/set)	For KUBOTA SAITO	10sets	10kg
0461	Mower Blade 300	310mm×40mm×4.0mm(2pcs/set)		10sets	8kg

Rice field & Vegetable field Goods

Vegetable field

Features and Benefits

Vegetable field: Shave the weeds close to the base and inhibit growth of weeds.

- 1) Easily attached to a brushcutter for quick mowing.
- 2) The resin cover on the outside would not damage crops or fruits.
- 3) Reduces the flying of pebbles.
- 4) Since the blade can be attached to a brushcutter, users do not have to bend down to remove weeds; they can easily mow while standing up.
- 5) Method of use: Place the shaver on the ground surface and slide the shaver above the ground surface to mow. Stubborn weeds spreading on the soil surface can also be removed by covering them with the shaver from the above.

Code	Description	For use	Size	Q'ty / Carton	Gross weight /Carton
0859	Hatake no shaver	Blade for Vegetable field	145mm×2P	40pcs	13.5kg
0860	Hatake no shaver spare blade	Blade for Vegetable field	-	20pcs	2.7kg
0863	Hatake no shaver DX	Blade for Vegetable field	185mm×3P	40pcs	21kg
0864	Hatake no shaver DX spare blade	Blade for Vegetable field	-	20pcs	4.5kg

Rice field

Features and Benefits

Rice field: Remove the waterweeds without injuring young rice plants. As cut the waterweeds, rice can contain rich nutrition. Stir around the mud and give a stimulus to them, then raise strong young rice plants.

- 1) Easily attached to a brushcutter for quick mowing.
- 2) The resin cover on the outside would not damage stubbles of rice plants.
- 3) Reduces water splashes.
- 4) The small diameter allows mowing in areas with narrow.
- 5) Can be used in rice paddies filled with water approximately one week to one month after planting rice plants.

Code	Description	For use	Size	Q'ty / Carton	Gross weight /Carton
0857	Mizukusa cutter	Blade for water rice field	130mm×5P	60pcs	10.5kg

Features and Benefits

As cut the millet, rice can contain rich nutrition. Improve rice quality and worth.

- 1) Two-in-one function including the claw to remove weeds from roots and the blade to cut weeds.
- 2) Users can easily remove weeds in rice paddies without bending down.

Code	Description	For use	Total Length	Q'ty / Carton	Gross weight /Carton	Color
0866	Hie nukukaru	Pull and Cut the millet	780mm	12pcs	4kg	Green
0868	Hie nukukaru	Pull and Cut the millet	780mm	12pcs	4kg	Orange

ZACT Pruning Saw

Pruning Saw/Gardening and Fruit Tree

Homeowners and any type of peoples want to cut 15mm to 50mm branches

Code	Description	Blade Length	Q'ty /Carton	Gross weight /Carton	For use

1263	UP-2400	240mm	60pcs	19kg	
1264	UP-2700	270mm	60pcs	21kg	
1265	UP-3000	300mm	60pcs	21.5kg	
Pruning Saw Spare Blade					
1312	UP-2100K	210mm	12pcs	0.5kg	
1313	UP-2400K	240mm	12pcs	0.6kg	
1314	UP-2700K	270mm	12pcs	0.9kg	
1315	UP-3000K	300mm	12pcs	1.0kg	

Folding Saw

Code	Description	Blade Length	Q'ty /Carton	Gross weight /Carton	For use
1291	FS-2100	210mm	60pcs	18kg	
1292	FS-2400	240mm	60pcs	18.5kg	
Pruning Saw Spare Blade					
1335	FS-2100K	210mm	12pcs	0.5kg	
1336	FS-2400K	240mm	12pcs	0.6kg	

Features and Benefits

① Impulse hardening

Impulse hardening produces ultra-hard edges.

② A rip saw

Allows effortless vertical, horizontal, and diagonal cutting thanks to the use of rip blade.

③ Hard chrome plating HC

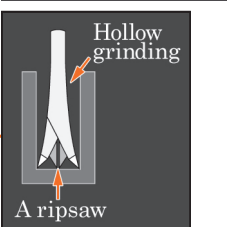

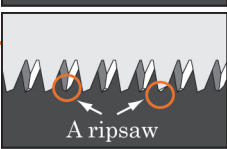

Hard chrome plating resists rusts and the adhesion of tar.

④ Hollow grinding

The polishing to reduce thickness at the center of a blade eliminates the necessity of alternate top bevels and produces clean cut surfaces.

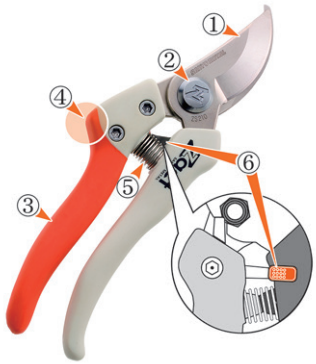

ZACT Pruning Scissors

Pruning Scissors

Features and Benefits

ZACT BLADE

① Sharp and durable edges of high-end carbon cutting tool steel and replaceable blades are finished with electroless nickel.

② Chrome steel rivet bolts to reduce rattling.

ZACT GRIP

③ Lightweight and durable non-slip grip.

④ Power grip to prevent a hand from sliding forward.

⑤ Soft cushion to absorb the shock upon scissors close.

⑥ An auto-open stopper can open and close by thumb easily.

Loppers

Features and Benefits

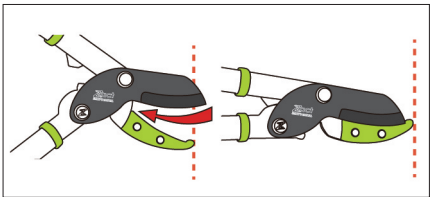

1)Lightweight and it won't make your arms tired.

(ANG-500 810g, ANG-650 900g)

2)The anvil system produces clean cut surfaces like sharp knives.

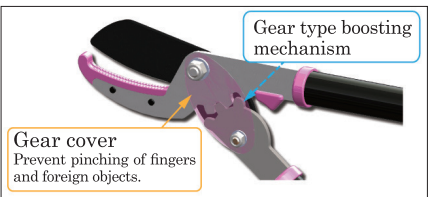

3)Thick branches can be cut effortlessly thanks to the principle of gear.

4)Reasonable replaceable blades are available.

【Anvil】

Since you cut a branch as if a kitchen knife and a chopping board, cut surface is beautiful. The branch is not wither or become sick easily. The inside and outside of the upper blade performed double grinding so it can cut well.

【Gear type】

Cut 30mm diameter branches easily by gear structure. Even women and elderly people can use this Loppers easily.
